## Horse Experience for the Lexington Visitor

Horse riding designed for the Lexington visitor to capture the total horse experience. First time horse riders learn about safety rules as well as hands on experience in brushing the horse, learning how to saddle, mount and ride the horse at a walk and trot. For the brave at heart, a canter or lope (slow gallop) is optional.

Learn a bit about horse psychology and physiology. Did you know that the horse has 2 lobes at the front of his brain....like people, but the lobes on the horse are not connected. The independence of the lobes allows the horse to fight predators with his front feet and back feet at the same time!
